

PRODUCT MetsäBoard Natural FBB CX 205 g/m²

COMPANY Metsä Board Corporation

MILL Kyro mill

Information gathered from 1.1.2025 to 31.12.2025 Date of issue 23.4.2026

PRODUCT ENVIRONMENTAL DATASHEET FOR PAPERBOARD

ENVIRONMENTAL MANAGEMENT

Certified environmental management system at the mill since 1999

Company systems ensure traceability of the origin of wood: YES NO 100% RECOVERED PAPER

Certified environmental management system for wood procurement and board and pulp production according to ISO 14001. Certified PEFC Chain of Custody (PEFC/02-31-92) and FSC® Chain of Custody (FSC-C001580). Certificates are available at [Metsä Board's web page](#).

ENVIRONMENTAL PARAMETERS

The figures are based on methods and procedures of measurement approved by the local (or national) environmental regulators at the production site. The figures include both pulp and paperboard production.

Water	Parameter	Value	Unit
	COD	4.0	kg/tonne
	AOX	0.027	kg/tonne
	NTot	0.112	kg/tonne
	PTot	0.006	kg/tonne

Air	Parameter	Value	Unit
	SO ₂	0.26	kg/tonne
	NO _x	0.43	kg/tonne
	CO ₂ (fossil)*	65	kg/tonne

*This figure does not represent a full scope 1, 2 & 3 of CO₂ footprint and neither of carbon offsetting emissions.

Solid waste landfilled 0 BDkg/tonne

Purchased electricity consumption*
/tonne of final product 1249 kWh

* Any CO₂ fossil emissions related to the purchased electricity are not reported.

SUPPLEMENTARY SHEETS TO PAPER PROFILE

MetsäBoard Natural FBB CX 205 g/m²

Metsä Board Kyro mill, Finland

MetsäBoard Natural FBB CX is a high stiffness cigarette packaging grade designed for high quality cigarette brands. It is produced without added OBA. Its natural-feeling smooth top side enables excellent printing results, and its high stiffness ensures faultless runnability at high conversion and packing speeds. The lightweight construction of MetsäBoard Natural FBB CX allows lower basis weights to be used without compromising strength and performance.

1. MILL INFORMATION

Metsä Board Kyro board mill produces folding boxboard (FBB) for packaging and graphics applications. The mill's annual production capacity is 190,000 tonnes of folding boxboard. The main market is Europe, but significant quantities are also delivered to Asia and North America.

Board is transported from the mill to ports on the west and south coasts of Finland by road. The board is transported to customers in Europe and overseas by vessel. Small quantities of paperboard are delivered by road to domestic and Scandinavian customers. Metsä Board only uses Metsä Group's own pulps in its production. Mechanical pulp (BCTMP) is delivered from Metsä Board's Joutseno and Kaskinen mills, and chemical pulp from Metsä Fibre's mills. The board mill's effluent is treated at a biological treatment plant. The treated effluent is directed after careful purification to the river Pappilanjoki. Metsä Board Kyro is located in the village of Kyrökoski, some 200 km northwest of Helsinki and 40 km northwest of Tampere.

2. MAIN ENVIRONMENTAL TARGETS AND PERFORMANCE

Metsä Board's sustainability targets are based on the company's strategy, the materiality assessment of sustainability matters and Metsä Group's sustainability targets. With our 2030 sustainability targets, we are committed to enhancing natural biodiversity, mitigating climate change, and promoting the sustainable use of natural resources. Metsä Board aims to phase out the use of fossil energy in production (i.e. zero fossil-based Scope 1 and 2 CO₂ emissions) and further improve the efficiency of energy and water use by 2030.

With a 79% reduction in fossil-based Scope 1 and 2 CO₂ emissions from 2018 to 2025, Metsä Board is already below the 1.5°C Paris-aligned 2030 emissions reduction level. In 2025, 93% of the energy used by Metsä Board was fossil-free. Metsä Board's energy efficiency declined by 7.2% (target+10% by 2030), while the use of process water per product tonne decreased by 8% (target -35% by 2030) from the 2018 level.

In 2025, Metsä Board achieved excellent scores in several ESG ratings, including CDP A List in climate change, water security, and forests; and the highest Platinum level and high scores in each of the four themes assessed by EcoVadis. These and other ratings provide important information of Metsä Board's sustainability ambition to our stakeholders and help us improve our operations further.

Read more in [Metsä Board Annual review 2025](#), [Metsä Board Sustainability Review 2025](#), and [sustainability website](#).

3. MANAGEMENT SYSTEMS

Metsä Board continuously develops the efficiency of its production units to improve resource efficiency and environmental performance. Metsä Board follows up on its environmental impact, for example, in the form of greenhouse gas emissions, energy consumption, water use and waste generation. One of Metsä Board's key duties is to guarantee that all its operations are sustainable and that all its products are safe for people and the environment.

All Metsä Board paperboard mills have certified ISO 22000 and FSSC 22000 food safety systems. The FSSC 22000 provides a framework for effectively managing a company's food safety responsibilities and is recognised by the Global Food Safety Initiative (GFSI).

Metsä Board's environmental management follows Metsä Group's Environmental Policy and complies with the ISO 14001 standard. The main principles of the Environmental Policy are environmental responsibility, sustainable forestry, and requiring responsibility in operations also from our suppliers. All production units have the ISO 9001 quality, ISO 14001 environmental, ISO 50001 energy, and ISO 45001 occupational health and safety management systems.

Metsä Board mills are certified according to PEFC and FSC Chain of Custody forest certification systems, which enable full traceability in the wood supply chain. The wood origins of Metsä Board's products are externally verified. Raw materials and services are purchased from suppliers who sign and follow Metsä Group's Supplier Code of Conduct.

4. ORIGIN OF WOOD

Regardless of the country of origin or whether it comes from certified or controlled forests, Metsä Group always knows the origin of the wood it uses, ensures its legality and takes measures to prevent the risk of unacceptable practices in the supply chain.

Metsä Group uses wood that comes from sustainably managed forests. Metsä Group's wood procurement is handled by the company's principal owner, Metsäliitto Cooperative. Metsäliitto Cooperative holds PEFC Chain of Custody, FSC Chain of Custody and controlled wood certificates. Metsäliitto Cooperative's wood origin tracing system is included in its certified ISO 9001 quality and 14001 environmental management systems.

Metsä Board uses only fully traceable wood for its products. In 2025, the share of certified wood Metsä Board used was 92%, while worldwide, only 10-11% of all forests are certified, and the remaining 8% came from controlled forest origins. The certification claim is shown on the delivery documents of each product.

Wood information of the product (gathered from 1.1.2025 to 31.12.2025).

COUNTRY OF WOOD ORIGIN	SHARE OF TOTAL WOOD SUPPLY	NAME OF SPECIES
Finland	100%	spruce (<i>Picea abies</i>), pine (<i>Pinus sylvestris</i>), birch (<i>Betula spp.</i>), aspen (<i>Populus tremula</i>)
Sweden	<1%	spruce (<i>Picea abies</i>), pine (<i>Pinus sylvestris</i>), birch (<i>Betula spp.</i>), aspen (<i>Populus tremula</i>)
Estonia	<1%	spruce (<i>Picea abies</i>), pine (<i>Pinus sylvestris</i>), birch (<i>Betula spp.</i>), aspen (<i>Populus tremula</i>)
Latvia	<1%	spruce (<i>Picea abies</i>), pine (<i>Pinus sylvestris</i>), birch (<i>Betula spp.</i>), aspen (<i>Populus tremula</i>)
Lithuania	<1%	spruce (<i>Picea abies</i>), pine (<i>Pinus sylvestris</i>), birch (<i>Betula spp.</i>), aspen (<i>Populus tremula</i>)

This product fulfils the requirements of EU Timber Regulation and UK Timber Regulation as well as US Lacey Act, and all Metsä Board paperboards will be in compliance with EU Deforestation Free Regulation when its implementation starts. 5. HANDLING AFTER USE

PRODUCT

The recommended handling after use is recycling but it can also be used for incineration. Preferred handling depends on local conditions and regulations. The product also has both industrial as well as home composting certification.

PRODUCT PACKAGING MATERIAL

The packaging material can be recycled or incinerated to produce energy. Preferred handling depends on local conditions and regulations.

6. ENVIRONMENTAL PARAMETERS

COD = CHEMICAL OXYGEN DEMAND

The amount of oxygen consumed in complete chemical oxidation of matter present in waste water.

AOX = ADSORBABLE ORGANIC HALOGEN COMPOUNDS

Reported as the total amount of chlorine bound to organic compounds in waste water.

N_{TOT} = TOTAL AMOUNT OF ORGANIC AND INORGANIC NITROGEN

P_{TOT} = TOTAL AMOUNT OF ORGANIC AND INORGANIC PHOSPHORUS

SO₂ = SULPHUR DIOXIDE

Total sulphur emissions to air from burning sulphur-containing fuels and from chemical pulp processing, expressed as SO₂.

NO_x = NITROGEN OXIDES (NO AND NO₂)

Nitrogen oxides emissions to air from combustion processes, expressed as NO₂.

CO₂ = FOSSIL CARBON DIOXIDE

In the context of papermaking, fossil carbon dioxide is generated from the combustion of fossil fuels during the production of pulp and paper.

BIOGENIC CARBON

The amount of biomass based carbon stored in the product, expressed as CO₂.

SOLID WASTE = NON-LIQUID WASTE LANDFILLED ON SITE AND/OR ELSEWHERE

Organic and inorganic waste materials are defined, calculated and declared as completely dry matter.

PURCHASED ELECTRICITY CONSUMPTION

Amount of purchased electricity per produced tonne of product.

Note: Emissions of SO₂, NO_x and CO₂ resulting from external electricity suppliers are not included.

Metsä

Metsä Board is a producer of lightweight and high-quality folding boxboards, foodservice boards and white kraftliners. The fresh wood fibres we use in our products are a renewable and recyclable resource that can be traced back to Northern European forests. We aim to phase out the use of fossil energy in our production by 2030. We promote a culture of diversity, equality and inclusion.

Metsä Board's shares are listed on the Nasdaq Helsinki. In 2025, our sales totalled EUR 1.8 billion, and we employ about 1,900 people. Metsä Board is part of Metsä Group, whose parent company Metsäliitto Cooperative is owned by approximately 90,000 Finnish forest owners.
