Legally compliant supply chain

Metsä Tissue AB is compliant with the following timber regulations
The EU Timber Regulation 995/2010, and once implemented, Regulation (EU) 2023/1115 on deforestation-free products
The UK's Timber and Timber Products Placing on the Market Regulations (UKTR) and UK FLEGT
Swiss Holzhandelsverordnung (HHV) 814.021

Sustainable and traceable supply chain

Metsä Tissue AB has two chain-of-custody certification systems in place to ensure that wood originates from sustainable sources, the Programme for the Endorsement of Forest Certification (PEFC/05-33-242) and the Forest Stewardship Council (FSC®) (FSC-C114488). Chain of custody certification provides means to ensure that wood harvesting is legal and sustainable and the origin of wood is known throughout the supply chain. By following (PEFC and FSC) chain of custody certification requirements Metsä Tissue AB is also choosing responsible partners and suppliers and following and reporting certified amounts and origin information correctly throughout the chain. Metsä Tissue AB chain-of-custodies are audited annually by an external third-party, in addition to conducting an internal audit each year. All non-certified wood used by Metsä Tissue AB fulfills the requirements of PEFC Controlled Sources and FSC Controlled Wood. In 2025, 96% of the pulp used by Metsä Tissue globally was either PEFC or FSC certified, with the remainder sourced from controlled origins.

STATEMENT

Origin of Wood Declaration

[Version 1.2, May 2026] 2 (3)

EU Regulation on Deforestation and Forest Degradation

Metsä Group (including Metsä Tissue AB) supports actions against deforestation and forest degradation. It complies with all legal requirements, in all territories that it operates and in all aspects of its business. Metsä Tissue AB due diligence system ensures that the products produced and placed on the market comply with obligations of the EU Deforestation regulation. Metsä Tissue is continuously following EU's guidance regarding the implementation of EUDR, and will adjust due diligence system accordingly. Metsä Tissue AB conducts due diligence as part of Metsä Group due diligence and annually risk assessment process for its wood value chain. Metsä Tissue AB's risk assessment process is country-specific and it is based on EUDR country risk classifications. Metsä Tissue AB's due diligence is combined together with other Metsä's sustainability related requirements such as FSC and PEFC chain of custody requirements. Observations from annual risk assessment are reported in a table as part of this document.

In case of auditing Metsä Tissue AB is committed to transparency and cooperation in the audit process.

Conclusion of the risk assessment, measures undertaken and a description of the information and evidence used to assess the risk

Country	European commission country risk classification	Conclusion
Finland	Low	Each country relevant to wood sourced for Metsä Tissue has been assessed for potential risks. All identified risks have been defined negligible.
Sweden	Low	
Estonia	Low	
Latvia	Low	
Lithuania	Low	
Uruguay	Low	
Spain	Low	
Portugal	Low	
Brazil	Standard	Risk mitigation measures implemented; identified risks have been defined negligible. Mitigation measures include but are not limited to sourcing only certified pulp and supplier assessment.
